

LACES 2008

Lezioni Avanzate di Campi E Stringhe

Galileo Galilei Institute for Theoretical Physics
Arcetri - Italy

24 November - 13 December, 2008

The aim of the school is to bring together PhD students with interests in Gauge and String Theory, and help them building a solid and specialised background on recent developments in Theoretical Physics.

The school is open to about 20 selected PhD students. Application to the School and for financial support is open until September 30th, and should be done through the registration page. Later applications might also be considered.

Topics covered this year include:

Mathematical Methods for Theoretical Physics
Advanced Topics in Field Theory
Introduction to Rigid Supersymmetry
Perturbative Superstring Theory

Lectures will be given by

**Carlo Angelantonj, Lorenzo Cornalba, Pietro A. Grassi,
Fawad S. Hassan, Gianluca Grignani, Luca Griguolo,
Domenico Seminara and Alessandro Tanzini**

Organisers

Carlo Angelantonj
Pietro A. Grassi
Gianluca Grignani
Luca Griguolo
Domenico Seminara

Secretaries

Antonella Pagliai
Margherita Pazzaglia

Computer assistance

Antonio Orlando

Sponsored by The Galileo Galilei Institute and by INFN
